**Subject:** BRANDS manuscript--a long time coming

Dear Gerry,  
Dear Daniel,

Please find attached the most recent version of the BRANDS manuscript:

'Chemical composition, cytotoxicity, and mutagenicity of smoke from US commercial and reference cigarettes smoked under two sets of smoking conditions' (E. Roemer, R. Stabbert, K. Rustemeier, D.J. Veltel, T.J. Meisgen, W. Reininghaus, R.A. Carchman, C.L. Gaworski, and K.F. Podraza)

The manuscript has been reviewed extensively by Ewald, Wolf, Richard, Chuck, and Ken and received subsequent formal written approval from PMRL-G (and Chuck, via e-mail). Please note that an earlier version was approved by Dick in June 2002.

We plan to submit the manuscript to *Toxicological Sciences* (Journal of the US-American Society of Toxicology) as soon as possible.

FORMALITY QUESTION: do we need to specify Richard Carchman's affiliation with PM?

Thank you.  
:-)  
Lynda

p.s. I'll be sending the new, signed PMI MRB info sheet to Daniel directly.  
note to Ken: confidence limits were too small to be added to figure 3, but we added them to figures 1 and 2
